

ELECTRICITY USAGE AT IEU

REPORT 2024

The International European University (IEU) is dedicated to monitoring and managing its electricity consumption throughout the year. Below is a summary of the annual electricity usage on the IEU campus for the years 2021 and 2024, broken down by month:

It's evident that the electricity consumption varies throughout the year, influenced by factors such as seasonal temperature changes, academic activities, and operational needs. The university is committed to monitoring and managing its energy consumption to ensure efficient usage and minimize environmental impact. The total electricity usage of campus in 2024 is 900 000 kWh.

IEU recognizes the importance of sustainable energy practices and is actively working to implement energy-efficient technologies, renewable energy sources, and energy conservation initiatives to further reduce its electricity usage and promote environmental responsibility. Additionally, the university periodically reviews and updates its energy management strategies to achieve a more sustainable and energy-efficient campus.
